

Manual monorail : 400 Series

Description

The overhead manual monorail 400 series conveyor, can receive hoists trolleys, or assembled trolleys for carriers or load bars. This manual monorail can be also organized as conveyor travelling bridge crane. Some areas of the manual conveyor can be motorized with lateral motorizations. For longer sections to motorize, the manual monorail 400 series can be motorized, using a trolley drive chain. See overhead power and free conveyor 2400 series.

Specifications

Rail section height 120mm x width 100mm x thickness 6mm
The trolley has 4 carrier wheels with steel bearings and 2 side wheels with steel bearings.
Maximum temperature : 250°C.
Maximum load for 1 trolley : 1000 KG

Components

- + Track
- + Curve
- + Switch
- + Turntable
- + Motorization
- + Motorized trolley
- + Drop section

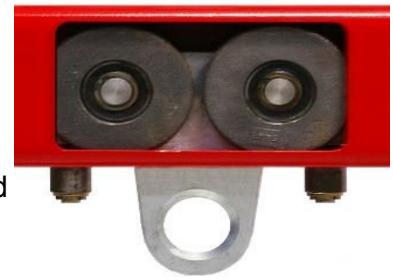

Specific equipment can be made on request.

For example : integration of special lifting systems, weighing, load bars for transported parts etc.

Assembly conveyor

As for all CONVOYNORT conveyors, delivered components will be assembled on site to each other by bolting, according to the provided assembly drawing. So assembly's opérations are reduced.

Realizations

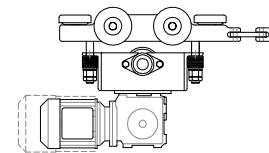

Hoist trolley

Assembled trolleys

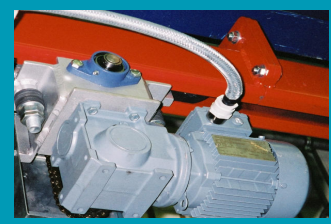

Trolley for travelling bridge

Motorized trolley

INFORMATION

Thanks to electrical supply track the monorail conveyor can receive one or more hoists manual or motorized moving.
